

® **Glutoclean**

Stone Cleaner S **Facade-Concentrate**

Description

Acid. For acid-proof surfaces. For clinker, brick and the like. Ideal also as patio cleaner.

Dilutable 1: 5 with water.

Effect

Powerfully and thoroughly removes stubborn contamination, such as residues from exhaust emissions and other emissions, lime deposits, saltpeter, cement film, efflorescence and similar inorganic and organic deposits of acid-resistant stone surfaces.

Area of application

For all acid-proof facades and stone surfaces, such as brick, clay brick, clinker, ceramic wall and floor tiles, concrete surfaces and lime-free natural stones insensitive to acids.

Application

Thoroughly pre-wet the stone surfaces to be cleaned, particularly in the joint area. Dilute Stone Cleaner S up to 1 : 5 with water and apply with brush, wide brush or paint-brush onto the surface (do not spray on). In so doing, work from bottom to top and in sections so as to prevent the cleaner from drying. Clean the surface shortly after application using a hard brush and thoroughly rinse with plenty of water. Collect rinsing water and cleaner residues and dispose of in accordance with the official regulations.

Note

Always test for surface compatibility before application and do preliminary tests to ascertain suitability and consumption prior to usage. Avoid contact with glass, metal, enamel and chrome surfaces as well as other surfaces sensitive to acids. Cover surfaces not to be treated prior to usage. Immediately wash off accidental splashes using plenty of water. Lime-containing natural stones, such as marble, shell limestone, calcareous sandstone and travertine as well as various granite types are sensitive to acids. Application of Stone Cleaner S can cause irreversible damage. Be sure to test prior to usage.

Technical Data

- Density: 1.02 g/ml
- pH value: < 1.0
- Appearance: reddish
- Odour: characteristic

Packaging unit

1000 ml bottle (4 items in carton)

Order No. 390 305

Info-Telefon: +49(0) 55 41 / 70 03 - 491

Safety notes

- Corrosive.
- Causes burns. Irritating to respiratory system. ☐
- Keep locked up and out of the reach of children. Do not breath vapour. Avoid contact with skin and eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of water. Wear suitable gloves and eye/face protection. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). Dispose of this material and its container to hazardous or special waste collection point. If swallowed, rinse mouth with water (only if the person is conscious).
- Contains: Hydrochloric acid, phosphoric acid

The conditions of use and fields of application of our products are very varied. We can provide only general processing directives in the product information. We can and should advise you in a non-binding way only. The utilisation of the products is to be checked and adapted to local factors and the surfaces to be treated. In all cases of doubt, or if there is no experience available, the product is always to be tried out beforehand at an inconspicuous location. We would be glad to advise you in case of special requirements.

We are liable for incomplete or false specifications in our informative data sheet only in case of major culpability (intent or gross negligence).
